

AGlaze water based Ceramic sealant range:

AGlaze AeroTech

AGlaze AeroTech is a Hybrid water based Ceramic Sealant which is applied to the exterior of the vehicle. It can be applied to either wet or dry vehicles, warm or cool paintwork, in direct sunlight and onto any surface of a vehicle.

AGlaze AeroTech is designed to give a tough & glossy Ceramic finish, whilst being as simple as possible for get ready departments. AGlaze Aerotech is safe to use on vinyl wraps and does not change the appearance of Matte surfaces. Environmentally gentle and no solvent odor.

- A Ceramic for busy get ready departments
- 5 mins to treat entire vehicle exterior
- Use for exterior preload & upsell
- Wash on or Spray on & wipe dry
- Safe on paint, metal, plastic, rubber & glass
- Apply to wet or dry and in direct sunlight
- Ready mixed & apply straight to surface
- Nullifies hard water streaking

AGlaze PolyCeramic

The ultimate in Ceramic protection. AGlaze PolyCeramic compliments appearance and quality for dealerships wanting the best.

The sealant's Poly-Ceramic polymers cross link as they cure, becoming completely insoluble in water. Leaving a tough, flexible shield that moves as the paint finish expands and contracts due to weather and temperature variations.

AGlaze PolyCeramic is safe to use on vinyl wraps and does not change the appearance of Matte surfaces.

- The ultimate Ceramic sealant for dealerships
- 5 mins to treat entire vehicle exterior
- Apply at drying stage of wash process
- Spray onto a clean wet surface and wipe dry
- Safe on paint, metal, plastic, rubber & glass
- Built in rinse aid to speed up drying process
- Ready mixed & apply straight to surface
- Environmentally gentle and no solvent odor

AGlaze Fabric

A unique all in one water based interior protector, with superior hydrophobic abilities. No petroleum solvents, AGlaze Fabric is safe and easy to apply to any vehicle interior.

Just spray directly onto carpets or fabric seats and allow to dry. For vinyl and leather, spray directly onto a clean microfiber cloth and wipe straight onto the surface.

AGlaze Fabric interior protection takes one hour to dry and 24 hours to cure before it becomes fully hydrophobic. AGlaze Fabric interior protection provides a smooth repellent surface protection, without changing the original appearance.

- All in one interior chemical for dealerships
- 10 mins to treat entire vehicle interior
- Spray on microfiber & wipe on vinyl / leather
- Spray directly onto a carpets and fabrics
- Safe on paint, metal, plastic, rubber & glass
- Apply at any stage of get ready process
- Ready mixed & apply straight to surface
- Environmentally gentle and no solvent odor

AGlaze Aviation sealant:

AGlaze Aviation sealant is the only self-bonding Fluorocarbon polymer sealant of its kind. Used to protect high value inventory such as Commercial & Private jets, Helicopters and Super Yachts. A very effective sealant, its outstanding ability is to convert harmful UV into harmless Infra-Red light. It outperforms dedicated UV protection systems and was used on Concorde during its active service.

Aviation Sealant with Anti UV protection:

AGlaze has developed the technology to allow Fluorocarbon Polymers to bond, simply by wiping over a surface. This allows for very fast application, as well as superior protection, increased gloss and longevity.

- Doubles paint life of commercial aircraft
- Converts UV light to harmless infrared light
- Safe on Matte surfaces – no change in appearance
- Applies to: Paint, metal, plastic – no white residue.

AGlaze Aviation Sealant range:

AGlaze Premium Aero

Dealerships can now apply the same Aviation treatment being used on airlines, private jet and helicopter companies.

AGlaze Premium Aero is safe to use on vinyl wraps and does not change the appearance of Matte surfaces.

A large SUV can be treated within an hour and AGlaze Premium Aero is available either on its own or with an optional kit for get ready departments.

- One hour to treat entire vehicle exterior
- Apply to clean dry surface after wash process
- Safe on paint, metal, plastic, rubber & glass
- Optional kit includes:
 - Exterior paint preparation
 - Aviation paint sealant
 - Glass Sealant
 - Fabric protector – all in one interior
 - Milwaukee Sureshot for interior
 - Disposable color-coded application cloths

AGlaze Aero Ceramic

AGlaze Aero Ceramic is the ultimate vehicle protection system, combining AGlaze Premium Aero aviation sealant and AGlaze PolyCeramic. Treated vehicles get maximum protection, gloss, and longevity with the benefits of anti UV and anti-corrosion protections.

- Ultimate sealant for:
- Protection
 - Longevity
 - Anti UV
 - Anti-Corrosion
 - Get ready
 - Detailers
